Education

- 2020- **PhD, Computer Science**, *Johns Hopkins University*, Baltimore, MD, GPA: -.
Advisor: Dr. René Vidal. Research Interests: Theory of Deep Learning, Non-Convex Optimization, Learning Theory
- 2018-2019 **Master of Science, Computer Science**, *Columbia University*, New York, NY, GPA: 3.83 / 4.0.
MS Thesis Track advised by Dr. John Wright
- 2014-2018 **Bachelor of Science, Computer Science**, *The University of Texas at Austin*, Austin, TX, GPA: 3.81 / 4.0.
Turing Scholars Honors Student
- 2014-2018 **Bachelor of Science, Mathematics**, *The University of Texas at Austin*, Austin, TX, GPA: 3.81 / 4.0.
Concentration in Pure Mathematics

Publications

WS = Workshop, TR = Technical Report.

4. Q. Ma, S. Ge, D. He, **D. Thaker**, and I. Drori. *Combinatorial Optimization by Graph Pointer Networks and Hierarchical Reinforcement Learning*. AAAI Workshop on Deep Learning on Graphs: Methodologies and Applications, 2020.(WS).
arXiv:1911.04936.
3. I. Drori, **D. Thaker**, A. Srivatsa, D. Jeong, Y. Wang, L. Nan, F. Wu, D. Leggas, J. Lei, W. Lu, W. Fu, Y. Gao, S. Karri, A. Kannan, A. Moretti, C. Keasar, and I. Pe'er. *Accurate protein structure prediction by embeddings and deep learning representations*. Machine Learning in Computational Biology, 2019. (WS).
arXiv:1911.05531.
2. **D. Thaker**. *Understanding the Convergence of Adversarial Training for Overparameterized Linear Neural Networks*. Columbia University Masters Thesis, 2019. (TR).
1. **D. Thaker**. *Generating Synthetic Question-Answer Pairs for Transfer Learning in Biomedical Question Answering*. UT Austin Undergraduate Honors Thesis, 2018. (TR).

Work Experience

- Spring 2020 **Research Intern**, SALESFORCE RESEARCH, Palo Alto, CA.
 - Mentor: Dr. Yu Bai.
 - Worked on obtaining a better understanding of feature learning in deep neural networks.
- 2019 **Course Assistant**, COLUMBIA UNIVERSITY, New York, NY.
 - Spring 2019: Course Assistant for *Deep Learning* taught by Prof. Iddo Drori. Responsibilities included holding office hours, grading and helping to design homeworks, and advising 5 groups of students with their final projects throughout the semester
 - Fall 2019: Course Assistant for *Analysis of Algorithms* taught by Prof. Alexandr Andoni. Recipient of CA Fellowship with full tuition waiver for excelling as a Course Assistant

- Summer 2018 **Research Intern**, THE CURIOUS AI COMPANY, Helsinki, Finland.
- Researched techniques for modeling uncertainty in model-based reinforcement learning applied to factory control
 - Trained various uncertainty models such as Bayesian neural network models for quantifying prediction uncertainty
- Summer 2017 **Software Engineering Intern**, FACEBOOK INC., Menlo Park, CA.
- Worked on WPR (Whole Page Ranking) for Facebook Search on improving ranking of modules (Pages, Groups, People, etc.)
 - Introduced new C++ API for module interleaving that allows quick prototyping of different strategies to interleave modules on the Search Engine Result Page
 - Trained new result-level ranking machine learning models and integrated them into the Search pipeline to rank and split modules using this ranker
- Summer 2016 **Software Engineering Intern**, GOOGLE INC., Menlo Park, CA.
- Worked on the Location team on online segmentation of location data
 - Set up a pipeline to tune hyper-parameters of the segmentation algorithm
 - Adapted the algorithm from a heuristic-based clustering approach to one that uses machine learning
 - Created an efficient C++ pipeline that allowed generation of training data, modular feature computation, evaluation in model, and evaluation of results
- Summer 2015 **Machine Learning Intern**, SYMANTEC: CENTER FOR ADVANCED MACHINE LEARNING, Mountain View, CA.
- Collaborated with a mentor to develop a robust machine learning classifier using gradient boosted decision trees to identify targeted malicious e-mail attacks
 - Explored feature engineering steps such as using spectral clustering for identifying clusters of criminal networks sending out similar email attachments
 - Project selected as one of top 12 company-wide projects from a group of ≈ 200 interns

Selected Coursework

- COMS 4771 - Machine Learning (Dr. Daniel Hsu)
- COMS 4995 - Algorithms for Massive Data (Dr. Alexandr Andoni)
- COMS 4252 - Computational Learning Theory (Dr. Rocco Servedio)
- ELEN 6998 - Sparse Representations and High-Dimensional Geometry (Dr. John Wright)
- EE 381K - Convex Optimization (Dr. Constantine Caramanis)
- SDS 325H - Honors Statistics (Dr. James Scott)
- M 373K - Algebraic Structures I (Dr. Sean Keel)
- M 365C - Real Analysis I (Dr. Hector Lomeli)

Honors and Awards

- Course Assistant Fellowship, Columbia University Fall 2019
- Turing Scholar Honors, UT Austin 2018
- University Honors, UT Austin 2014-2018
